# ELECTRIC VEHICLES

Electric cars are good for the environment and good for your wallet. While gas prices may fluctuate, electricity remains a great value. With a charger at home, you can leave every morning with a full tank.

## ELECTRIC VEHICLES - RESIDENTIAL INCENTIVE

Level II Charger \$500

Limit of one rebate per household.

- This rebate is for residential members of Clarke Electric Cooperative only and limited to one charger per home.
- The rebate is for a Level II charger requiring a 240/208 volt input supply.
- The primary charging location of the vehicle must be located at the address provided as the home address of the member served by Clarke Electric Cooperative.
- It is recommended that a qualified electrician complete the installation and verify the panel is large enough to accommodate the charger.
- The rebate equals 50 percent of the installed cost up to \$500.

Please make sure to program your vehicle so it will not charge during the peak usage period between 4 and 9 p.m. whenever possible. This will help keep costs down for members of Clarke Electric Cooperative.

## ELECTRIC VEHICLES - COMMERCIAL INCENTIVE

Rebates are now available for commercial electric vehicle chargers and electric vehicles.

Level II Chargers	\$1,000 each
Electric Vehicle/Plug-in Hybrids	\$250 each

- The primary charging location of the vehicle must be located at the address provided as the business address of the member served by Clarke Electric Cooperative.
- This rebate is for commercial account members of Clarke Electric Cooperative only.
- New, purchased Level II Chargers only (240/208 volt).
- Chargers must be installed at the address provided as the business address served by Clarke Electric Cooperative.
- No more than five vehicles and Level II Chargers per location.
- Rebate will not exceed 50 percent of the installed cost.
